

# Fueling Instructions

1. Place the **green** spill container under your fueling spot.
2. Securely connect the fueling hose to your car's gas hole.
3. Go back to the pump station and press the small black button on the meter once.
4. Record the running total under "START" on the log sheet.
5. Press the black button again. This shows the amount pumped by the last member.
6. Hold the black button down until the meter shows zero.
7. You are now ready to start fueling.
8. Turn on the power to the fuel pump by flipping up the silver "on" lever.
9. Go out to your car and begin fueling.
10. Listen carefully for when your tank is getting full.
11. **DO NOT LET YOUR TANK OVERFLOW.**
12. When finished, immediately turn off power to the pump by flipping the silver lever "off". This prevents the pump from burning out.
13. Go back to your car, manually pickup the fuel hose to let any fuel in the hose drain into your tank. This prevents spills with the next user.
14. Return the hose and spill bucket to the container.
15. Finish filling in the log sheet by recording the amount of fuel you pumped.
16. Leave payment (12.6 gallons x \$3.40 = \$\$42.84) Make checks payable to EcoDiesel.
17. Clean up. There are rags and hand wipes in the container.
18. Turn off the light.
19. Lock door and return the keys to the key lock.

**Enjoy running your car on cleaner burning BioDiesel!**
